Dr. F. E. Eames, Hon. Treasurer  
The Malacological Society of London  
Ramleh, Morton Road  
Horsell, Woking  
Surrey

Dear Dr. Eames :

Thank you very much for your kindness in sending your two fine publications and in making inquiries concerning Mr. Wrigley's library. I appreciate your marginal notes in your publications very much; they are real time-savers to me.

The middle Eocene pelecypods of Stone City bluff in Texas are still keeping me busy. The Veneridae are rather difficult to understand in spite of previous efforts by Dall, Gardner, Frizzell, Van Winkle, and Keen. One of the shells seems to be a Sinodia, which is surprising for it is the oldest of the genus and the first from America.

By separate mail I am sending you the Card Catalog, which was started here many years ago but may never be continued now. Also I am preparing another group of reprints for you.

Sincerely,

H. B. Stenzel, Geologist
