Dear Hugo:

I have had Turner's old course in "Tertiary Stratigraphy and Paleontology" wished off on me.

There will only be four students so I can't do a lot of harm. Many points bother me just now and I would like to come over and talk them over with you.

This will be sometime in the next two weeks. Do you expect to be out of town? I will let you know by wire before I come.

Respectfully,

Curtis J. Hesse
