Dr. H. B. Stenzel,  
Austin, Texas

Dear Dr. Stenzel:

I am sending you today parcel post the additional specimens from the ant hill near Roanoke, Denton County. You asked for the little ammonites and I am sending all that I collected from the ant hill and I also include a few additional crustacean fragments.

The specimens include various shells, ammonites, fragments of crustaceans, and one that I think is a brittle-star.

I should like to have all my specimens returned to me except such as may be of value or especial interest to you and such you are welcome to retain.

Very kind regard.

Sincerely,

*Fred. T. Moseley*
