Dr. Henryk B. Stenzel
Bureau of Economic Geology
Union Station, Box B
Austin 12, Texas

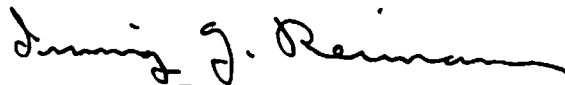

Dear Dr. Stenzel:

About five years ago, when I was still in Buffalo, I sent you a collection of decapods from the Pierre Shale of South Dakota with the agreement that you could keep the major types when you described the material. I have been wondering if you have lost interest in this collection. If so, I shall appreciate the return of all of the specimens. To compensate for the gastropods and concretions which you sent me, I can send you some Traverse crinoids and blastoids.

If you still intend to study and describe my decapods, I shall be grateful for the return of all the specimens which will not be illustrated. It was our original understanding, you will recall, that all such specimens were to be returned to me.

With very best regards,

Cordially yours,

Irving G. Reimann
Prefect of Exhibits
