

May 31, 1937

Mr. T. H. Withers
Department of Geology
British Museum (Natural History)
Cromwell Road
London, S. W. 7

My dear Mr. Withers:

I am in receipt of your last two letters of May 13 and 14 and am sending you the fossils which you asked for. It would be quite all right if you were to split the supposed peduncle plates and retain one-half of the number for your own purposes. I am also sending at the same time the two fossils for which you asked in your letter of March 15.

I have not had an answer from Dr. F. E. Turner about additional cirripede material. Should they come at a later date I will be glad to forward them to you.

I am very glad that you have been able to identify the curious little peduncle plates, which were, of course, a very great puzzle to me too.

With kind regards,

Sincerely yours,

H. B. Stenzel, Geologist

HBS:MJC
Enclosure

Sent by separate mail, three vials containing:

1. Peduncle plates from Smithville, Texas.
2. Euscalpellum eccenense - 1 rostrum (label D) from Claiborne Landing.
3. Euscalpellum eccenense - 1 scutum (label B) from Leon County, Texas
