Professor Katora Hatai
Institute of Geology and Paleontology
Tohoku University
Sendai, Japan

Dear Professor Hatai:

Thank you very much for sending me copies of your several papers. I was much interested in your "Japanese Miocene Reconsidered" and the references to desmostylid sea cows.

These fossil sea cows have been discovered in the Miocene of the Texas Coast (compare Stenzel, Bull. American Association of Petroleum Geologists, vol. 28, no. 7, pp. 977-1011, 1944).

Very truly yours,

H. B. Stenzel
