Dear Mangel,  
Göttersham 12 Nov. 18  
Postzeedijk 64

This week I received a letter from  
Knothe. Your letter to him was enclosed,  
and so I know something about your  
life in Texas. A lot of things must be  
new to you there. You are a paleontologist  
now and will dig bones of big animals  
(quite american).

Prof. Claus got a call to Bonn.  
I think he will accept. In a short  
time I will see him, when he is at the  
other side of the boundary. What will  
happen in Breslau I don't know. Knothe  
wrote it was a nervous atmosphere there.  
My Dr. is coming very slowly. Brown  
is prof in Utrecht too. Now he has more  
time to work for himself.

The "Bataafsche" man takes engineers  
from Delft, but I think mostly to work  
with that modern Eotvos balance from  
Schweida. When I want money  
I will become an oilman but I  
will wait some months before I do so.

Gluck's still writes letters and sends  
portraits. Knothe wants to separate. He costs  
money but he will do it. Have you ever  
heard something from me. Don't you miss me
