J. BROOKES KNIGHT, Ph.D., Research Associate in Fossil Invertebrates  
ARTHUR K. MILLER, Ph.D., Research Associate in Fossil Invertebrates

January 27, 1947.

Dear Henryk:

I am very much interested in your comments about Mr. C. G. Moon. Will you suggest to him that he write to the Secretary of the Geology Department at Columbia requesting application blanks for admission, assistantship and fellowship.

I am interested to learn if you have had an opportunity to look at the little collection of fossils which I sent you. My manuscript is now receiving final typing and any comments that you might make on the fossils could be of great importance as regards my stratigraphic conclusions. My manuscript on Lake Titicaca will make a small book, and it will soon be in the hands of the G.S.A. editorial staff.

It looks as though Bernhard Kummel will soon be working with you at Austin. I think that you will agree with me that he is one of the most able, most charming young men that one could desire for a companion. I commend him to you in the highest terms.

Cordially yours,

Norman D. Newell  
Curator of Fossil Invertebrates.

Dr. H. B. Stenzel,  
The University of Texas,  
Bureau of Economic Geology,  
Austin 12, Texas.

P.S. I note that Mrs. Moon is prepared to do some teaching on a temporary basis. I suggest that she get in touch with the English Department here at Columbia. Perhaps, she, also, will be in line for an Assistantship or Scholarship.

NDN.
