Dr. H.B. Stenzel
Shell Development Co.
P.O. Box 481
Houston 1, Texas

Dear Dr. Stenzel:

I am glad to hear that you have recovered from the
gout and feeling able to work again.

Rose Taff's address in San Francisco is:

Miss Rose Taff
2140 Great Highway
San Francisco 16
California

I hope the retouching will improve the sharpness of the picture so it
will show up well in the printing. Rose has the original picture but I
suppose if you had it you would have to make a negative just as she did.

I am at present working on a L. Cretaceous Foram fauna and am finding
that there isn't very much published on the L. Cret. Forams. The best papers
I have found so far are those by Loeblich and Tappan on the Duck Creek,
Maness shale, Washita and Walnut of Texas and Southern Oklahoma. I have not
seen the paper by D.O. Carsey on the Cretaceous of Central Texas but it is
possibly also Upper Cretaceous. If you should happen to have a correlation
chart of the Texas formations, I would like to have a copy of it.

I have C.L. Moody's chart which shows the formations of East Texas and
the Gulf states but it doesn't include the rest of Texas. (A.A.P.G. 1930).

Mentioning the charts reminded me that I do have Grace Wilmarth's charts
for Oklahoma and Texas which are quite complete to 1930 so they will probably
give me the information I will need on formations.

I too enjoyed our visits in San Francisco and any help I may have given
was my pleasure. If I can be of any further help just let me know.

Very truly yours,

C.C. Church
