

13/8/42 - No.4

PURCHASE PRICE OF EARLY POTATOES BOUGHT BY MINISTRY

The Ministry of Food has already announced that it is prepared to buy potatoes of first and second early varieties for clamping, in districts where supplies are greatly in excess of demand.

A lump sum will be paid for these clamps, calculated according to the estimated quantity of ware on $1\frac{1}{2}$ inch riddle, at a rate 10s.0d. per ton less than the fixed growers' price at the time of inspection by the Ministry.

Offers by growers of first and second early varieties, for which no market can be found, should be made to the nearest Area Potato Supervisor.
