AIR MAIL

Professor A. Azzaroli
Istituto di Geologia
Dell'Università di Firenze
Via Lamarmora N. 4
Firenze, Italy

Dear Professor Azzaroli;

Your research results concerning the structural evolution of the Somalia region are very interesting and should be published in the English language. The best place is probably the Bulletin of the American Association of Petroleum Geologists, which has a wide circulation and which is read by many geologists working in foreign countries. If you wish, I shall be glad to help you submit it to that journal. I have been a member of that society of many years.

One more remark, please do not call your English language paper a translation, but call it rather a summary of research.

Please do not hesitate to call on me for assistance.

Sincerely yours,

H. P. Stenzel
