Austin,
Texas

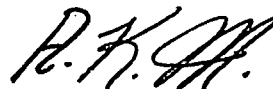

Dear Henryk:

Bill Furnish and I have completed a study of the two Navarro representatives of Eutrephoceras that you kindly loaned me. Accordingly, I am today returning them to you by parcel post, and of course I hope that they will make the return trip safely.

Like you, I hardly know what to think of the ventral flattening or how much taxonomic significance to accord it. Nevertheless, I am convinced that if we keep thinking about these matters, eventually we will reach the correct decision in regard to them.

Thanking you most sincerely for the loan of these specimens, and with best personal regards, I remain

Cordially yours,

A. K. Miller

AKM:j11

P. S. I will soon be seeing you in Toronto.
