12. 2. 57

Dear Dr. Bennett,

You were kind enough to write to me on 13. 3. 56 in reply to a letter of mine about Jn 389 (old Jn 04). I got it in England, and never had time to go into the matter again, as I was too busy enjoying myself otherwise than with Minoan. I have now gone into the matter with the new edition of the Tablets & cannot but agree with you that the # must be $\frac{1}{4}$ of 2, & that there must be some queer error in 389's calculation. This is not the only mistake in figures: there is the 43T9 of Ep 704.6 against the 3.9.3 of Eb 297, which ^{latter} must be right because it tallies with the addition of L 1-4 of Ep 704. (This is a very human touch. Just at the place where accuracy wd be desirable - a dispute as to title - the Revenue Accountant makes a mistake in (as I think) area)

I venture to ask you to be so good as to send me an off print of your Landowners at Pylos AJABO (if you have a copy left) which I see referred to by the London list of Cl. Studies. It is difficult to get hold of all the publications here in Sydney.

yours sincerely

D. J. N. Lee
