Dr. Carl C. Branson
Box 708
Carlsbad, New Mexico

Dear Dr. Branson:

I have just come from Alabama where I tried to get to the Gosport locality that you discovered north of Isney. Stearns McNeil told me about that locality. However, the weather was so bad that we could not do any collecting whatsoever. I would liked to have seen that locality because it is the westernmost known fossiliferous Gosport. If you have some time and can send me a sketch of the roads leading to that locality I would appreciate it greatly.

I am sending you now a copy of the nomenclatural synopsis for which you asked in April.

With best regards,

Sincerely yours,

H. B. STENZEL
Geologist
