Dr. H. B. Stenzel
3726 Colquitt St.
Houston, Texas

My dear Dr. Stenzel:

Dr. Stohler at the University of California suggested that I write to you in order to get the proper identification for the oyster that is caught off the south shore of Portugal. I have used *Gryphea angulata* Lamark but Dr. Stohler believes that *Gryphea* is the genus of a fossil oyster. Where I got the scientific name is beyond my memory; possibly I read it in a Portuguese book or possibly someone in Portugal gave it to me. Can you help me.

Are you, by any chance, the Dr. Stenzel whom I knew in Austin several years ago?

I should greatly appreciate your writing to me at the above address.

very sincerely

Dan Stanislawski
