Dr. H. B. Stenzel
University of Texas
Austin, Texas

Dear Dr. Stenzel:

Thank you for sending a separate of the Stenzel-Turner paper on the Miocene invertebrate fauna from Burkeville. You did a real job on that mixed assemblage. Do you have any separates of the A.A.P.G. paper to spare?

I was also interested in the Beckman-Turner paper on the Seguin formation. Years ago I had a hand in getting C. B. Claypool to work on the Wilcox of Central Texas.

Unless something unexpected develops, I expect to visit Austin early next month. Shall probably arrive late on the night of February 9th. Could I see you on the afternoon of the 10th--or sometime the following day (Sunday)? I hope you are not scheduled to be away in the field.

With best regards,

Sincerely yours,

Harry S. Ladd
