

November 2 - We're mailing our Christmas wishes especially early because we're leaving Rio, probably later this month. The work in Brazil is finished and we are being sent elsewhere. The Dallas office will forward our mail and we hope you'll write us and let us know how you are enjoying your new department and the girls their new schools and associations. We've been very happy in Rio and are sad to be leaving but it is always exciting, too, to be pushing on to a new place. Our travels in Brazil were less extensive than we would have liked but it is such a vast country and we had so little free time. Keith's field work was mostly in the south in the coffee country but we did accompany him on one trip north to the old city of Salvador in the state of Bahia.

What we had all enjoyed most had been Rio's mild climate. It gets hot but nothing like Texas and it has never been uncomfortably cold since we arrived.
