

TEXAS ENGINEERING EXPERIMENT STATION

Feb. 20, 1932

Dr. H. B. Stenzel
Geology Dept.
Campus

Dear Doctor Stenzel:

I am submitting the results of analyses of the four samples of gneisses you gave me early last month.

Ferrous oxide is not determined in three of the samples for lack of a certain reagent, and all iron appears as ferric oxide.

If you wish it, I will determine the ferrous oxide as soon as this reagent is received.

Sincerely yours,

P. J. Alwin Zeller
