

January 27, 1950

Dr. Robert O. Vernon
Associate State Geologist
Florida Geological Survey
P. O. Drawer 681
Tallahassee, Florida

Dear Dr. Vernon:

The two cores which you recently sent to me arrived safely. Unfortunately, both are wholly unidentifiable. The smaller fossil seems to be Plicatula rather than an oyster.

Sorry I can not help you this time. The cores are being returned to you by separate mail.

With best regards,

Sincerely yours,

H. B. STENZEL
Geologist
