Dear Dr. Stenzel:

Your telegram was received yesterday afternoon. I tried to call you at Centerville to let you know that I would be glad to take the field trip Sunday but was unable to locate you. We are to go to San Antonio for several days work and had expected to leave late Sunday afternoon or early Monday morning. This would have given us time for the trip with you. Just this morning I learned that I should be in San Antonio on Monday morning so we must leave this morning just as soon as we can get our things packed. I am very sorry that we cannot go with you today to see some of the outcrops in this area and make some collections. Would you come over some other time?

Very truly yours,

*Willis Clark*
