Dr. H. B. Stenzel.
P. O. Box 481.
Houston 1.
Texas, U. S. A.

Dear Dr. Stenzel.

Thank you so much for your letter. I have asked the curator of marine invertebrates of the University Museum to see if there should be some named *Ostrea*'s which could be of some use for you. Unfortunately there are only few with good labels. *Ostrea cochlear* from Port Alger and from Cagliari, *Ostrea hyotis* from Alutryonia Ind. Oc. There is however some unnamed samples mainly from the Indopacific with reliable localities, but otherwise this is all.

I have my offices in the museum building but have nothing to do with the museum itself.

Sincerely yours

T. Soot-Ryen
