Dr. H. A. Pilsbry
The Academy of Natural Sciences of Philadelphia
Logan Square
Philadelphia, Pennsylvania

Dear Dr. Pilsbry:

I have sent to you a package containing mollusks collected at Galveston, Texas. This collection is much more complete than the one from Point Isabel and has correspondingly much more value as a check on the distribution of the mollusks. I would appreciate it if the collection were to be identified in the same way as the other one and returned to the Bureau.

I have discovered that Singley's private shell collection is now in the attic of the Geology Department here on the campus. Singley as you remember was a conchologist of the old Dumble Geological Survey of Texas in the 90's.

Sincerely yours,

H. B. Stenzel, Geologist
