Dott. Victorio Sacco
Via Filippo Baldimucci 91
Milano, Italy

Dear Dr. Sacco:

Your address was given to me by courtesy of the Istituto di Geologia dell'Universita de Torino, for which courtesy I am very grateful. I am a geologist and paleontologist specializing in the Tertiary stratigraphy and fossil faunas of the region surrounding the Gulf of Mexico. It is for that reason that I have become partly acquainted with the publications of your illustrious father, who has contributed so much to the understanding of the Tertiary Mollusca of Piemonte and Liguria. Unfortunately I am only partly acquainted with these works because in this new country the libraries are not fully equipped and lack many of the important European classical scientific works.

For these reasons, I am very anxious to find out from you whether the publications of your outstanding father are still available, and I believe you may be in a position to point out to me sources from which I may obtain these important publications.

I would be very grateful to you if you could see your way clear to point out these sources to me and I hope you can do so.

I am Very truly yours,

Dr. H. B. Stenzel
