Dr. H. B. Stenzel
Department of Geology
University of Houston
Houston, Texas

Dear Dr. Stenzel:

I am wondering if you think that Ostrea johnsoni is in any way related to the Cubitestrea sellaeformis stock. As you know, it occurs in the Little Stave Creek section somewhat above the middle of the Tallahatta, and in Choctaw County in the top of the Tallahatta. Sometime at your convenience, I would like to know what your opinion is concerning the relation of this Ostrea.

With very best wishes,

Sincerely,

Hinnie McGlamery
