

dear Sir, Its after quite some time I am writing to you. My attention was drawn again to the Ptolemy's disc around which our friendliness is built. Now I can give some time to this problem and the time I have spent is most useful. There is great mathematical order underneath the seemingly confusing spirals. How each symbol rises up in perfect order is as beautiful as the stars themselves. I do not think modern astronomers have found such a simple way of representing ~~heavens~~ ^{universe} in heavens. If you take the head of the 'dog' 'Sirius' in Egyptian times and now even and trace its climb and retete it to time you can appreciate what I say. One thing I wish that a set of mathematical instrument and plan for engineering drawing must be there. One general feature I have noted is the concentration of some figures at the ~~center~~ centre and edge and these alternate in the two sides. I will send you some detailed drawings.

There is something much more important to convey to you confidentially. What is the position of a scholar who knows the causes of conflict - is man. That means the cause of war. It will be very useful to you as you are being so much valuable lives in conflicts. and if this trend persist it will ebb down the whole European culture again and a dark age possible. I had to sacrifice whole of my youth enjoyment time. Honour and fame was

who has made a very valuable contribution to medical knowledge in their hands use their knowledge with responsibility. I have a bold and independence with the knowledge I gather but with others who collect from a book such flexibility, independence or responsibility is lacking towards others or knowledge.

I think every country must have an independent Peace Dept because conflicts are so general. This had been the case in early political organizations here. Such a dept can forestall conflicts and maintain peaceful relations. Please convey my regards to Prof. Gordon I have found a good friend in Prof. Schmidt of Neuro-Sum Program I am keen to ~~write~~ correspond with a practicing medical man
