Mr. H. B. Stenzel
P. O. Box 481
Houston 1, Texas

Dear Dr. Stenzel:

Enclosed under this cover please find several specimens of Flemingostrea subspatulata (Forbes) collected from the Ripley Formation near the north city limits of Thomaston, Alabama. They ^{were} ~~are~~ collected from the same locality as the ones I sent to you last year. I am including some of the opposite valves and I am sorry to say that the preservation is somewhat poorer than I had anticipated.

I hope that these specimens are of use to you and that they are not too late. I have several extra specimens that you may have if you want them.

Sincerely yours,

Ernest E. Russell
Associate Professor
Geology & Geography
