Dear Dr. Stenzel:

Thank you for your letter of July 23 and the information about the East Texas Geological meeting.

Enclosed is a copy of the letter to Mr. Neville Curtis, Jr., in regard to his letter of July 17. I hope this clarifies the matter for him once and for all.

If you have any glauconite samples from the Claiborne that you would like to have analyzed please do not hesitate to send them to me. I am interested in obtaining data on the glauconites in the East Texas embayment in contrast to the more marine glauconites related to our studies in the Gulf of Mexico.

Best regards,

Dan E. Feray
