Dr. H. B. Stenzel
Bureau of Economic Geology
University Station, Box B
Austin 12, Texas

Dear Dr. Stenzel:

Your letter of January 13 with your request for samples from our contra-flush core holes in western Bastrop and eastern and northern Caldwell Counties came while I was out of town for a week. We will be pleased to make the samples available to you, however, as a result of a recent reorganization and consequent redistribution of our files, the sample material has been scattered throughout several offices. Some of our samples are now so small that it may be necessary to have them returned to us, but where possible we will attempt to give you a cut which you may retain.

I would suggest that the easiest way to handle the matter is for you to get in touch with Mr. P. B. Hinyard of our San Antonio office in the Alamo National Bank Building and determine the location of the core holes which are of interest to you. If all the material is not stored in San Antonio, we will arrange to send the desired sample cuts to you.

Trusting that we will be able to assist you in your stratigraphic problem, and with kindest regards,

Cordially yours,

Roy R. Morse
