Mr. H. S. Puri  
11 Gurasaday Road, Ballygunge  
Calcutta 19, India

Dear Mr. Puri:

Please accept my thanks for your reprints of

"Some Fossil Leaves of Mallotus Philippinensis Muell. from the Karewa Beds at Laredura and Liddarmarg, Pir Panjal, Kashmir",

"Some Fossil Leaves and Fruits of the Common Himalayan Ivy (Hedera Helix L.), from the Pleistocene of Kashmir",

"Some Fossil Leaves of Berberis from the Karewas of Kashmir",

"The Occurrence of a Tropical Fig (Ficus Cunia Buch-Ham.) in the Karewa Beds at Liddarmarg, Pir Panjal Range, Kashmir, with Remarks on the Sub-Tropical Forests of the Kashmir Valley During the Pleistocene".

I am very glad to have your publications and I am sending you by separate mail some of my reprints.

As you will see from my publications, I am chiefly interested in Tertiary faunas and fossil crustaceans. In view of the great interest of the Indian Tertiary, I have been wondering whether it is possible to obtain some of that material.

Sincerely yours,

*Sent to him*

*A new Paleocene Catantopse Crab...*

*Nomenclatural synopsis*

*New Eocene Brachiopods*

*Decapod Crustaceans from the Cretaceous of Texas*
