H. B. Stenzel  
Department of Geology  
A. & M. College  
College Station, Texas

Dear Doctor Stenzel:

I was very sorry that I had to leave without thanking you for your assistance and your kind hospitality. We appreciated both very much. I hope you will express my gratitude to your wife and we hope that we may have the opportunity of returning the favor.

Under separate cover I am returning the list of localities which you gave Mrs. Alexander. I have copied these in my notebook.

Since returning to Fort Worth I have been busy washing up the samples I collected with you and so far they have all been very rich and the specimens well preserved. Tomorrow I am returning to the Centerville locality and after that will visit the localities you listed around Longview and Palestine.

I hope that you have a pleasant and successful trip to Washington.

Sincerely yours,

C. I. Alexander  
Assistant Professor
