Dear Doctor Jablonski:

You will remember that about a year ago we talked about the possibility of my leaving the Bureau for oil company work. This possibility is drawing nearer now, and I would like to make some preliminary inquiries.

Could you be so kind as to give me some information as to the possibility in your company. What I would like to know is possible location, type of work, and other conditions of employment, also an approximate range of remuneration and whether it would include expenses. As I would like for you to be able to explain things freely, I would like your statements to be merely advisory and in no way binding and not to be construed as in promise of employment. In other words, this letter is wholly exploratory.

I suppose you are familiar with my past experience, but, perhaps, I might state that I am thoroughly experienced in mapping, paleontology, of larger fossils, stratigraphy, and structural geology.

With best regards.

Sincerely yours

HBS:LS
