

January 8, 1963

Dr. J. Sornay
Curator of Invertebrates
Institut de Paleontologie
8, Rue de Buffon
Paris V^e, France

Dear Dr. Sornay:

In response to your letter of December 26, 1962, concerning Texas Cretaceous ammonites, I shall try to do my best to obtain them for you. All the ammonites which were collected by me were left at the University of Texas, when I moved from Austin to Houston in 1954. Since then, very few ammonites have been collected by me. However, my friends in Austin and Fort Worth will probably be able to supply some ammonites, and they have already been alerted.

Enclosed is a list of fossil oysters from France which could be used to advantage here. Would it be possible to obtain some of these species.

With best wishes for a healthy and enjoyable 1963,

Sincerely yours,

H. B. Stenzel
