Dear Dr. Stenzel,

Summer is nearly upon us and it is hard to realize that a year ago today I was in the Stockholm State house for the doctoral awards ceremony & that I deep later I was on my way to Russia.

In the current issue of the J. Paleol. you see notice an article by Hakker, et. al. on the Terghana Basin of Southern Russia - obviously taken from the 2nd book on same topic which I sent you last year. This makes it painless - now that it is in English -

If you have seen the March Rev. of Micro paleontology you will have noticed Hopkin's latest diatribe! This time it is me that he singled out for his damnation - of all my series shortcoming, apparently the fact that I followed "l'ecole americaine" & am impeded w. American ideas is the worst. He wrote me a long letter last year before I left for Russia saying he'd already finished a paper refuting everything I had said. That was a month or less after I sent him my papers. Fast work! I suppose I should feel honored. After all Hakker doesn't criticize just anyone! I think H. should take his place alongside Werner and other such 'great' in

geology.

My attempts to prepare a zonation of the Tertiary for Libya are progressing slowly. The Tertiary is a rather large order but I hope to present the company with something soon.

We move into our new house today. Some of our things have arrived from Copenhagen (newly purchased furniture) while things from Stockholm arrive in 2 weeks. We live about 800 m from the sea & so we have had a chance to look & get brown on our trips out to work on the house. There's just 10 lbs here & feel very good. The Swedish climate was never exactly the best - although summer was hard to bear there.

I hope you have received the rest of the things from Dr. Nasdin - I have not heard from him lately. We plan to visit Moscow, Warsaw, Belgrade & Stockholm on our vacation this November -

I hope you are well and that your work progresses O.K. Jim Wilson is due here in June I hear. Will be nice to see him again.

Best regards from us,
Bill Simpson

Several people from U.H. now work here. Perhaps you remember them: J. Fleming, R. Rogers, Don Baker. A tall fellow Charles Allan Jones was here on his way to Nigeria recently. He's with Amosco (TEKALCO) & was also at U.H. a while -
