Dr. Edmund H. Spieker
Ohio State University
Columbus, Ohio

Dear Spieker:

In response to your letter, which arrived yesterday afternoon, I am suggesting that you write to Dr. C. Gardley Moon, c/o Exploration Department, Humble Oil and Refining Company, P. O. Box 2180, Houston, Texas, and ask him whether he would be interested. He received his Ph. D. here recently and has oil company experience; he has teaching experience and is of very good caliber in many ways. His wife also has teaching experience in geology and paleontology. The Moons would be a very good addition to your staff, and I am prepared to write a more extensive evaluation of the two, if Moon will indicate he is available.

Another possibility is Dr. Roy W. Graves, 11458 East Bradhurst, Whittier, California. I would regard him as second choice.

With best personal regards,

Sincerely yours,

H. B. STENZEL
Geologist
