Dr. Jorgen Wind  
Iystrup Street  
Jylland, Denmark

Dear Dr. Wind:

By separate mail there is being sent to you a collection of fossils from the Midway group of the U.S.A. As you know, the Midway group is regarded as Paleocene; some authors consider it even Danian in age. Certainly it is regarded as Tertiary by everyone familiar with it.

I am sorry this collection is so late in being sent to you. But better late than never.

In 14 days I shall be at the University of Houston, and my new address will be:

H. B. Stenzel, Chairman  
Geology Department, University of Houston  
3801 Gullen Boulevard  
Houston 4, Texas

With best wishes,

Sincerely yours,

H. B. Stenzel, Geologist
