P.O. Box 481
Houston, Texas 77001

Dear Dr. Stenzel:

I am sorry that I did not know that you were working on this little brach earlier so I could have sent you the specimens to be considered in your report. Perhaps if they add characters, you will include it in a future work.

Quite naturally I will be happy to get together for a chat about things Littig. I will be leaving here on the 14th to go to the SVP meetings in Florida but should be around almost any other time if I knew a day or so in advance. The Littig is one of our better Elasmobranch faunas and Charlie McNulty and I plan a publication on this fauna within a year.

Sincerely,

Bob H. Slaughter
