AIR MAIL

Dr. R. Tucker Abbott
Academy of Natural Sciences of Philadelphia
Philadelphia 3, Pennsylvania

Dear Tucker:

This summer, I shall be able to come to Philadelphia to study the Ostreidae at the Academy. First, the International Zoological Congress, especially the sessions on Zoological Nomenclature, will have to be attended to (August 20-27). Then, I intend to study the Ostreidae at the National Museum for about a week (August 27-early September), but after that I hope to be welcome at the Academy (early in September for about 10 days).

I hope you and Miss Orr will be there at the time, so we can have long discussions on the Ostreidae.

With best wishes.

Sincerely,

H. B. Stenzel
