March 13, 1941

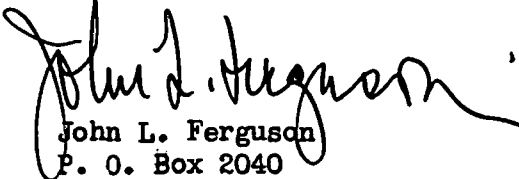

Dr. H. B. Stenzel,  
Bureau of Economic Geology,  
Austin, Texas.

Dear Dr. Stenzel:

I wish to remind you that the Tulsa Geological Society wishes to have a summary of the paper "Surface Relationships of the Carizo Sand of Texas", which you presented before the society March 3.

It is the custom of the society to publish annually a printed Digest of the papers presented before it, and these abstracts are prepared by the authors in order that the high points of the papers may be properly stressed. Will you, therefore, at your early convenience prepare two or three double-spaced type written pages summarizing the very interesting information which you presented to us.

Very truly yours,

  
John L. Ferguson  
P. O. Box 2040
