GEOLOGICAL SURVEY

2 July, 1933

Dear Doctor Stenzel:

We certainly are glad to hear that you are coming to Washington for the Congress. My present plans include only the A-5 excursion. I had hoped to take the C-2 but times being what they are, I've given that up. perhaps you'd better write Doctor Paul Bartsch, Curator of the Division of Mollusca, Smithsonian Institution, saying that you are coming. The collections are under his supervision and it is usually easier to have the formalities satisfied before you arrive.

Yours very sincerely,
