

June 14, 1958

Dear Dr. Stenzel

I am very glad to see you getting out in the field every now and then. I know you are enjoying it when you do get out. I realize that you have been busy at the office and I knew that must be the reason you hadn't answered sooner.

I have quit worrying about my grade there at U of Houston, there doesn't seem to be anything left to do there. I really have no intentions of suing, that might not be a good idea.

I knew George was home. We were through Houston at night on the Memorial Day week-end and stopped by his house. He seems to be real glad to be back home.

I was unaware that you had talked to Univ. of Texas about my thesis. I certainly do appreciate your efforts. As far as L.S.U. & AIM are concerned, don't you think their rules may be rather inflexible also.

I received a copy of Lamar Tech newsletter also.

They seem to be doing very well as far as advancing the department. I suppose I might attempt to get them to accept my thesis and graduate work for the Masters degree when they begin their graduate school. That is apparently the only alternative if I ever want to receive the actual degree.

I intend to get all copies of my thesis from U of H the next time I am in Houston. Did you ever receive your copy of thesis? I believe I remember that one copy wasn't in the graduate office.

Well, I'm very glad to hear your health is improving. I hope it continues to do so. Give my best to the two girls.

Yours truly
Joe F. Scales
