

October 11, 1953.

Dr. R. C. Moore
Department of Geology
The University of Kansas
Lawrence, Kansas

Dear Ray:

Thank you for your recent letter. To answer your question about the Treatise project on oysters, I expect to have it completed in Spring 1954. Such free time as I have is being used on this work.

If the first paragraph of your letter can be interpreted as I am inclined to do - or is it wishful thinking? -, I am available for work at the University of Kansas and am interested in any proposition you may have in mind.

The University here found out that it can not legally give any financial support for trips to Toronto. So no one from here except the rich is going to be in Toronto. It would have been nice to see my friends again and to get a lot of mental stimulation.

With best personal wishes

Sincerely,

H. B. Stenzel
