

June 3, 1954

Mr. Walter M. Fitzgerald, Jr.
918 S. Bois d'Arc
Tyler, Texas

Dear Walter:

Thank you for your recent letter. It is always good to hear from you. Keep that map as long as it is necessary, but don't forget me in the end.

As to Turney in Cherokee County, there is the U. S. Geological Survey topographic quadrangle of Rusk 1:62500 which should prove useful for elevations and topography. The geology of the area around Turney is covered by plate 3, U. S. Geological Survey Bull. 902 (Eckel, E.B., (1938), The brown iron ores of eastern Texas: U.S.G.S. Bull 902). There ought to be several faults in this area.

Please remember that my new address, beginning September 1, is: Geology Department, University of Houston, 3801 Cullen Boulevard, Houston 4, Texas

With best wishes,

Sincerely,

H. B. Stenzel
Geologist
