Box B, University Station
Austin 12, Texas

Dear Stenzel:

I am planning on a field trip during Easter to collect some fossils and samples from some type localities in Mississippi and west Alabama. If it can be arranged I would enjoy being with your group. You are probably going places that I would be interested in.

I shall leave here Thursday and shall spend Thursday night in Mobile. Friday morning I shall drive to Jackson, Mississippi and visit the Moodys Branch type locality at Hazel St. and Poplar Blvd., if it is still accessible. I also would like to visit the exposures at Byram. Perhaps we shall be in Jackson at the same time and if so I could meet you there. Where do you plan to spend Friday night? I have to be back here Tuesday morning and therefore would have to start back Monday afternoon.

Yours very truly,

Lyman Toulmin
