Mr. W. S. Adams  
Shell Petroleum Corporation  
Shell Building  
Houston, Texas

Dear Adams:

I hope the samples I sent you recently arrived safely. The matrix of the rudistids might have given you a good sample of *Edwardsia cognata*. Please return to us the fossils and such of the material as you have not used.

I am trying to locate for our Centennial exhibit a good slab of *Enogyra arctica* shell agglomerate. Do you know of any locality that will give a block of about five by five feet square?

Very sincerely yours,

H. B. Stenzel, Geologist
