Professor H. B. Stenzel  
Department of Geology  
Louisiana State University  
Baton Rouge, Louisiana 70803

Dear Dr. Stenzel:

At long last I have completed my paper on the basal Ocala sand at Clinchfield, Ga.. In this paper I have compared the foraminiferal fauna identified from this sand with those (my identifications) from the "Cooper Marl" of Baldock, S. C., and the Dellet Sand at Claiborne Bluff, Ala. I believe you will be interested in these findings and the conclusions reached. If this paper gets through the mill (Survey review and approval for publication) in time I plan to submit it for publication in Transactions - Gulf Coast Association of Geological Societies and to their technical program that they are getting together for their Annual Meeting in Miami next Fall. Consequently I am hoping that you can find the time in which to act as one of my reviewers, Ruth Todd, naturally, being the others, since my identifications have to be checked. If this is agreeable to you I shall appreciate a reply, at your convenience, so that I can send a copy of this paper on down to you. I hope that this favor will not impose on your time but appropriate reviewers are few and far between these days and I feel that this article should be published if at all possible.

I hope this letter finds you in good health and thanking you in advance for your help I am,

Sincerely yours,

S. M. Herrick
