

INDIAN TERRITORY ILLUMINATING OIL COMPANY  
AND  
SUBSIDIARY COMPANIES

BARTLESVILLE, OKLA.

804 S. A. N. B Bldg  
San Angelo Texas

Dear Dr. Stenzel:

I wish to thank you for the information which you gave me regarding the geology of the central Mineral region. Although, since having written to you, the company has sent two men here to do special work in the area lying between here and San Antonio, I shall be doing sub-surface work on that region along with the work I am doing in the Permian basin.

Mathews, a former Aggie geology student who finished at Okla. U is here and works for the Empire. He is the only one of the old gang I have seen lately. Buck (E.O.) is at Ft. Stockton for the Gulf, and I suppose Slim Gunn is still running a magnetometer for the California in North Texas.

How many students are finishing in Geology this year? How are they getting along and what luck in finding jobs? I shouldn't like to discourage anyone but the field is none to rosy.

Kindest regards and best wishes,  
Sincerely yours  
Hewlett A. Purcell
