

H B Stenzel  
Bureau of Econ. Geol.  
Austin Texas

Dear ~~Dr~~

Got a reply from Miller!  
Says he will help as much as possible but  
that he has had a <sup>recent</sup> letter from Newell  
who intimated that he was going to be  
at Baltimore.

He tells me that Chicago,  
Minnesota, Northwestern and Cornell all  
need paleontologists and suggests that  
I ask you if you would be interested in  
any of those. In his words your work is  
"nothing short of excellent" and asks that you  
write him if interested. I believe you made  
some remarks about the Cornell position  
while I was in Austin. The others are in  
the center of Paleozoic areas and might  
not be at all what you want. I have  
good friends at Chicago and Northwestern  
and would be glad to write them if you  
think the possibilities worth while.

If you are interested in a  
job with any oil Co I would like to suggest  
your name to the Standard of Texas but  
do not know that they have any work  
in mind that you would fit into. The  
only high pay job they have to offer are  
in the Paleozoic areas!

John Emery
