

March 25, 1966

Mr. Peter R. Rose
1503 Murray Lane
Austin, Texas

Dear Pete:

It was a pleasure to get your letter and to see what you are doing. The dates you set seem to be free and you shall be welcome. So far, no special duties are looming for those days, but one can never tell.

I have talked with Lozo about your project and we have outlined several things for you. He has a list of the items in case I am not available. It might be good for the three of us to have a conference when you are here.

Yours for more history of geology in Texas and less rootlessness among local geologists

Sincerely,

H. B. Stenzel
