Dr. H. B. Stenzel
Shell Development Company
Box 481
Houston 1, Texas

Dear Dr. Stenzel:

I trust your trip to Europe was a profitable and enjoyable one. Pete Rodda and I will be anxious to hear of your experiences there.

We are sending, under separate cover, our manuscript on the evolution of the Athleta petrosa stock; we will appreciate greatly your criticisms, comments, and suggestions. Plate I, an index map of localities, is not included as we do not have a reduced blue-line copy. Also to be added as an additional plate is the program prepared for the CDC 1604 computer. Publication is planned as a Bureau Report of Investigations.

Pete and I will look forward to visiting and talking with you at the G. S. A. meetings next month.

With kindest regards, I am

Very truly yours,

Bill
