

Groene  
June 26

Hello Dr Stenzel:

2002 NORTH H  
Midland  
Texas

Looks like we both have the same problem — I'm also out of writing paper.

It was very good to hear from you and especially about your offer to teach. Personally I think it would be wonderful for you. As for your age, you may be 67 in years but not in mind. You looked wonderful the last time I saw you in Houston. I still think you have much to offer the men in the profession. I know I will never forget you or having worked under you.

I would like to say this now in order to set

things in order. I am not trying to flatter you by the things I have done, but rather to show my appreciation for what you have done for me in connection with my present job. Your reputation is still remembered by your old students and any geologist worthy of the name. Your advice to me was good and paid off - I read and re-read it many times since you sent it.

My situation is getting better and I have just been given another merit raise so that I feel that my supervisor's attitude can not hurt me.

Now, I need some information. Will you be in Houston the month of July and what is little Yetta's present address?

The reason for this is that  
the Pecan melon season will  
be wady sometime in July  
and I would like to send  
you both some melons.

It's hard to realize that  
Jetta is grown up. I can  
still see the little girl  
trying to piece fossil  
fragments together.

Please keep me posted  
on your location from time  
to time.

The best of everything,  
Ralph Gorman
